

Job Description

We are excited to announce an opening for Financial Systems Senior Analyst - Hyperion at Inspire Brands.

Please find below the details of the role and its responsibilities.

Skills Required:

EPBCS, PBCS, Hyperion, Oracle Hyperion

Experience Range:

2 - 6 years

Job Description:

Job Title: Sr. Analyst, Financial Systems – Oracle EPM (ePBCS & ePCM)

Location: Hyderabad, India

Department: Accounting – Financial Systems

Reports To: Manager, Financial Systems

Position Summary:

We are seeking a detail-oriented and proactive **Sr. Analyst, Financial Systems** to support and enhance our Oracle EPM Cloud applications—**Enterprise Planning & Budgeting Cloud Service (ePBCS)** and **Enterprise Profitability & Cost Management (ePCM)**. This role will be responsible for the day-to-day administration, data integrity, and continuous improvement of our financial systems. The ideal candidate will bring a hybrid of functional and technical expertise, with a strong foundation in financial planning and a passion for optimizing enterprise performance tools.

Key Responsibilities:

System Support & Administration (70%)

- Administer and maintain Oracle ePBCS and ePCM environments, ensuring system availability and performance.

- Manage and monitor data loads using tools such as **FDME**, **Data Exchange**, **Data Pipeline**, and **Data Integration**.
- Perform rigorous **data validation** to ensure completeness and accuracy across planning and profitability models vs. Source Systems.
- Develop and maintain **Standard Operating Procedures (SOPs)** and user training documentation.
- Provide day-to-day support to finance users, resolving issues and answering functional/system-related queries.
- Create & optimize new processes and automate existing processes in the Oracle EPM environment including the Monthly Patch testing requirements in both systems.

Projects & Enhancements (30%)

- Improve and optimize existing calculation models and allocation logic in ePBCS and ePCM.
- Design, develop, and maintain **business rules**, including complex logic beyond basic data copy or clear operations.
- Lead and support **system testing**, including the creation of test scripts and execution of test plans for enhancements and patches.
- Collaborate with cross-functional teams to identify opportunities for automation, process improvement and new functionality.

Required Qualifications:

- Bachelor's degree in Finance, Accounting, Information Systems, or a related field.
- 3+ years of hands-on experience with Oracle ePBCS, PBCS, or Hyperion Planning.
- Demonstrated experience creating and managing business rules and allocation logic.
- Foundational understanding of **financial planning and analysis (FP&A)** concepts, including P&L structure and forecasting processes.
- Strong problem-solving skills and a **solution-oriented mindset** with the ability to work independently.
- Excellent communication skills and the ability to collaborate effectively with both technical and non-technical stakeholders.

Preferred Qualifications:

- Experience with Oracle ePCM or PCMCS.

- Familiarity with scripting languages (e.g., Groovy, SQL) and automation tools (e.g., EPM Automate).
- Exposure to REST APIs and integration with ERP systems (e.g., Oracle Cloud ERP).
- Oracle EPM Cloud certifications are a plus.

Core Competencies:

- **Functional-Technical Balance:** Ability to bridge the gap between finance and IT, with a focus on functional outcomes.
- **Data Accuracy & Integrity:** Strong attention to detail in managing and validating financial data.
- **Process Improvement:** Continuous improvement mindset with a drive to enhance system performance and user experience.
- **Communication & Collaboration:** Clear communicator who thrives in a team-oriented environment and can work across departments.
- **Ownership & Initiative:** Self-starter who takes initiative and ownership of tasks and projects.
