

Assessment Sheet - Oracle EPBCS	
Name of the Candidate: Sathish	
Technical Skillset	Years of Experience
Total Experience	4.3 Years
Relevant Experience	4 Years
Oracle	4 Years
EPBCS	4 Years
Hyperion	2 Years
Communication :	3.0/5.0

Summary of Qualifications

- Accomplished Oracle EPM Consultant with over 4 years of hands-on experience in implementing, supporting, and enhancing Oracle Hyperion Suite products including Essbase, Planning, Smart View, PBCS, Data Exchange and EPBCS.
- Proven track record of delivering end-to-end EPM Cloud implementations across Finance and Planning modules, with deep expertise in application configuration, metadata management, business rule development, and data integration.
- Strong technical understanding of financial planning processes such as P&L, balance sheet planning, and forecasting; ability to translate complex business requirements into scalable technical solutions.
- Experienced in migrating on-premise Hyperion applications to Oracle 'Cloud (Free Form Planning), optimizing performance of Essbase cubes, and automating processes using EPM Automate.
- Skilled in conducting client workshops, gathering business requirements, and delivering high-quality documentation including design specs, configuration workbooks, training materials, and testing scripts.
- Adept in stakeholder communication, cross-functional collaboration, and end-user training — ensuring smooth adoption and long-term sustainability of EPM solutions.
- Passionate about continuous learning and committed to delivering efficient, reliable, and high-performing enterprise planning solutions that align with business objectives

Industry Experience

- Working as a Oracle EPM Consultant in MicroLine Information System, Hyderabad, from 2021 to Present.

Category	Description	No. Of projects
Role	Senior Consultant	1
Role	Consultant	2

Academic Profile

- Completed B.E (Automobile)from university college of engineering (BIT campus)2018

Software Skills

- EPM : Hyperion Essbase, Planning 11X and PBCS/EPBCS
- Reporting Tools : Smart View and Essbase Spread sheet Add-In

Projects Undertaken

1. **Project** : Hyperion Enhancement and Support (Wells Fargo)
Role : Senior Consultant
Technology : EPBCS

Responsibilities:

- **Participated in business stakeholder workshops and requirement-gathering sessions** to understand financial planning needs and translate business requirements into scalable technical design solutions.
- **Led the end-to-end implementation of key financial modules in Oracle EPBCS**, including modules for Profit & Loss and Balance Sheet planning, aligned with out-of-the-box (OOB) model capabilities.
- **Captured all configuration requirements in structured workbooks** and maintained accurate documentation for forms, rules, process flows, and dimensional hierarchies.
- **Configured the EPBCS environment** to meet business requirements, including creation and customization of data forms, calculation rules, business processes, and metadata synchronization.
- **Conducted playback sessions with business stakeholders** to review the configured solution, gather feedback, and refine the system based on iterative inputs.
- **Enhanced the performance of calculation scripts and data load processes**, ensuring faster execution and improved user experience within the EPBCS environment.
- **Performed comprehensive unit testing and integration testing**, including validation of Informatica mappings to ensure accurate data flow between source systems and EPBCS.
- **Collaborated closely with cross-functional teams**, including finance users, developers, and QA teams, to ensure successful rollout and user adoption of the planning solution.

-
2. **Project** : UMB
Role : Consultant
Technology : Essbase and PBCS

Responsibilities:

Led the end-to-end migration of legacy on-premise Essbase applications to Oracle EPM Cloud (Free Form Planning), ensuring minimal disruption to business processes and seamless transition to the cloud environment.

Validated complex financial data sets post-migration using Smart View reports and ad-hoc analysis to ensure data integrity and reconciliation between source and target systems.

- **Re-engineered legacy security models by converting traditional filter-based security into modern cell-level security (CLS)**, aligning with cloud architecture and enhancing data access control.

- **Reviewed and refactored business rules and calculation scripts** to meet cloud compatibility standards, improve performance, and accommodate evolving business logic.
 - **Created and automated the upload of substitution variables and metadata using EPM Automate**, reducing manual intervention and increasing deployment efficiency.
 - **Collaborated with cross-functional teams**, including finance users and IT, to identify and resolve migration challenges related to metadata alignment, data accuracy, and system configurations.
 - **Developed comprehensive technical and functional documentation**, including migration plans, cutover strategies, validation checklists, and troubleshooting guides.
 - **Delivered hands-on training and knowledge transfer sessions to end-users and support teams**, ensuring they were well-equipped to work in the new cloud environment and adhere to governance standards.
 - **Monitored and optimized the performance of migrated applications**, identifying bottlenecks and tuning cube structures, calc scripts, and load rules as needed.
-

3. Project	: Hyperion Planning (Florida Banks)
Role	: Consultant
Technology	: EPM Essbase, Planning

Responsibilities:

- Developed and supported **Oracle Essbase** and **Hyperion Planning** applications to facilitate enterprise-wide financial planning, forecasting, and reporting processes.
- Designed and built **BSO (Block Storage Option) cubes** tailored to complex business requirements; gained hands-on experience with **ASO (Aggregate Storage Option) cubes** for improved performance in large-scale reporting environments.
- Created and maintained **metadata outlines, rules files, data load scripts, and calculation scripts**, ensuring accurate and efficient data transformation, consolidation, and aggregation.
- Implemented and managed **application security models** in Hyperion Shared Services, defining user roles and access levels to ensure data confidentiality and compliance with organizational policies.
- Conducted regular **performance tuning and optimization**, including application defragmentation, to enhance system speed and stability while reducing calculation and load times.
- Validated data accuracy and consistency using **Smart View**, reconciling against source systems and developing **ad-hoc Excel-based reports** for end users in finance, accounting, and operations.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and deliver enhancements aligned with business objectives and planning cycles.
