Over 5.9 years of **Oracle EPM ARCS experience** playing various key roles in development, Enhancements, Deployment, and application management activities. Constantly updating my skills. An energetic, self-motivated and Performance driven business management professional with an enriching experience managing all aspects of Business Intelligence. Able to use own initiative and work as part of a team. Proven team role skills, including performing and motivating other staff to achieve company objectives.

TECHICAL SKILLS

- ☞ Oracle EPM Modules : Oracle ARCS, EPBCS, FCCS.
- ☞ ☞ ETL : Oracle Data Management
- ☞ Database: Oracle Hyperion Essbase, Oracle 11C. ☞ Operating System : Windows Server 2012 R2.

As part of my experience in Oracle EPM Hyperion Consultant worked on Development, Application maintenance and Application security.

Oracle Accounts and Reconciliations:

- ☞ Experience in Implementation of Reconciliations and Transaction Matching modules.
- ☞ Worked on Requirement gathering, Design and deployment process.
- ☞ Working on Auto Submit, Auto Approve rules at Profile level and Format level.
- ☞ Experience in loading data using Data Management and Pre-mapped Balances/Transactions.
- ☞ Experience in the Transaction Matching design and development.
- ☞ Experience in Creation of Match Types, Attributes, Calculated Attributes, Matching Rules and Adjustment criteria in ARCS.
- ☞ Designing Data Management to pick up data from file to Reconciliation Manager and Transaction matching Targets.
- ☞ Experience in managing security of the application.
- ☞ Working with Enterprise Journal to post ARCS Adjustments back for Reconciliation compliance and Data management for Transaction Matching adjustments.
- ☞ Experience in Migration of Application and Artefacts from one application to another application.

Oracle EPM Data management (Integration):

- ☞ Worked on various integration methods from various sources to ARCS like ERP Fusion, EBS, SQL base data source, EPM modules and Bank format files.
- ☞ Created integration from ERP using BIP report, ESS job and Direct integration for Fusion GL and subledger data into ARCS.
- ☞ Created the integration using EPM agent to pull data from SQL base database and automated the process.
- ☞ As FCCS and EPBCS as source for Trial balance data and integrated to ARCS.

Project Experience

EPM professional with over 5+ years of experience designing and implementing over 14 enterprise solutions across USA & Europe. Implemented 14 projects, including 11 focused on EPM ARCS and 2 on cloud EPM FCCS and EPBCS FP&A solutions. Extensive experience in implementing Oracle EPM Cloud solutions utilizing **ARCS, EPBCS, FCCS, FDMEE, DM, BI Publisher** and various Reporting & Analytics products, etc.

Below are few of the key highlights which I have worked during various organization.

Client	Suncorp
Duration	Mar-23 – Till date
Role	Senior EPM Consultant
Products	ARCS, FCCS, Data Management, EPBCS, EPRCS, BI Publisher, SQL Scripting.

Responsibilities:

- ☞ Responsible for leading ARCS Solutions
- ☞ Implemented 8 ARCS projects across USA, Europe & Australia
- ☞ Directed EPM module rollouts for Fortune 500 clients, increased 20% operational efficiency & reduced Reconciliation time by 15%.
- ☞ Designed 7 Reconciliation compliance modules and 15 Transaction Matching processes including complex schedules & banking statement, generated revenue of ~8M \$.
- ☞ Integrated ARCS with ERP GL data using Data Management and automated scheduled data loads.
- ☞ Utilized EPM Automate and scripting to streamline reconciliation tasks and reduce manual effort.
- ☞ Automated Reconciliation process for 20,000 Accounts across 8 ARCS projects.

- ☞ Reduced transaction matching time by 87.5%, optimized system efficiency from 3 hours to 15 minutes.
- ☞ Migrated 3 Reconciliation Compliance modules Blackline, OneStream & On-Prem ARM to ARCS cloud.
- ☞ Developed complex Transaction Matching logics achieving approximately 98% matching rate, reducing the matching process by 85%.
- ☞ Deployed 15 integrations across various platforms (EBS, Peoplesoft, JDE).
- ☞ As the ARCS SME established a skilled pool of resources through continuous training which saved 30% budget in new recruitment.

Client	vertiv
Duration	May 21- Mar-23
Role	Oracle EPM Developer
Products	ARCS, EPBCS, Data Management, Batch Scripts, BI Publisher, SQL Scripting, EPM Automate.

Responsibilities:

Responsible for leading ARCS Solutions.

- ☞ Created the ARCS application, generating over 15,000 profiles across multiple clients.
- ☞ Developed transaction matching system capable of handling ~ 500,000 lines daily, with a performance time of 10 minutes.
- ☞ Designed and configured ARCS Profiles and Formats, implementing automated transaction matching to enhance reconciliation accuracy.
- ☞ Managed Reconciliation Compliance workflows, enabling audit-ready processes with attachments, commentary, and variance explanations.
- ☞ Integrated ARCS with ERP GL data using Data Management and automated scheduled data loads.
- ☞ Utilized EPM Automate and scripting to streamline reconciliation tasks and reduce manual effort.
- ☞ Conducted UAT and end-user training, and produced procedural documentation and best-practice guidelines.
- ☞ Collaborated with FP&A and Controllershship teams to optimize workflows and maintain data governance in reconciliation processes.
- ☞ Designed approach to consolidate multiple ARCS applications into one, reducing cloud costs of ~ 1M \$.
- ☞ Implemented Transaction Matching with balance comparison between GL, subledgers, & banks reducing client FTE utilization by 80%.

- ☞ Optimized 11 integrations by transitioning from file-based to direct integration & reduced dependency on file-based systems.

Client	TWG
Duration	Sep'19 – Mar'21
Role	Associate EPM Consultant
Products	ARCS, EPBCS, Essbase, SAP BPC, Data Management.

Responsibilities:

- ☞ Developed a 3 Reconciliation application with 18000 profiles and 12 custom reports.
- ☞ Architected scalable ARCS frameworks facilitating business growth, accommodating a 30% transaction volume increase.
- ☞ Created 12 integrations in EPBCS to extract data from SAP HANA automated the process using SAP BODS.
- ☞ Maintained 100% SOX compliance, secured financial data through robust security measures, and passed annual audits successfully.
- ☞ Delivered stakeholder training, achieved 95% user adoption rate, enabled clients to fully utilize ARCS system capabilities.
- ☞ Led end-to-end implementations of ARCS, including setup of calendars, data sources, reconciliation types, and matching processes in the matching module.
- ☞ Configured reconciliation formats, compliance rules, and security models across ARCS applications.
- ☞ Developed integrations between ARCS and GL systems, leveraging Data Management and managing metadata in Oracle EPM.
- ☞ Participated in configurations for related Cloud EPM applications such as FCCS and EDMCS.
- ☞ Delivered documentation and performed training sessions to transition teams from manual to ARCS-based reconciliation.
- ☞

Work Experience:

- ☞ **Oracle EPM Developer** Worked as an **Oracle EPM Developer** with Hiprowes Solutions Pvt Ltd, Hyderabad, India since Sep 2019 to Oct 2025.
