Email: gripvr478@gmail.com

Phone: +91 9916220903

Objective

To build a career in the IT industry and achieve professional expertise in information technology with integrity, efficiency, and dedication. I seek to contribute to organizational growth while pursuing personal development.

Professional Experience

Capgemini Technologies

June 10th, 2025 – Present

Project: Bench

I been waiting for the Project to assign

Integra Connect

Nov 11th, 2020 – June

6th,2025 Project: Health

Care Project

Role: Devops AND Site Reliability Engineer

Job Responsibilities:

- Extensive hands-on experience with **Site Reliability Engineering (SRE) principles** to ensure system reliability and scalability.
- Working as **SRE and Observability Engineer**
- Proficient in **Splunk Observability Suite** and **Splunk Cloud tools** for monitoring and analytics.
- Integrated **Splunk** with **Azure Cloud** for seamless observability across cloud-native environments.
- Designed and implemented **dashboards** to monitor **application performance** and **infrastructure health**.
- Developed **alerting mechanisms** for proactive detection of performance and infrastructure anomalies.
- Skilled in **production issue detection, diagnosis, root cause analysis (RCA), mitigation**, and proposing effective resolutions.
- Strong understanding of service-level diagnostics across microservices and distributed systems.

- Expertise in diagnosing **API calls** and **endpoints** to support functionality restoration and performance tuning.
- Practical experience applying the **MELT (Metrics, Events, Logs, Traces)** methodology for observability.
- Solid grasp of **REST API methods** and their implementation across various platforms.
- Experience handling **Java**, **.NET**, and **Python-based application APIs** for performance and error resolution.
- Proven ability in **team leadership** and **project management**, ensuring timely delivery and quality outcomes.
- Collaborative experience working closely with **developers** to manage **exceptions** and resolve **application errors**.
- In-depth experience diagnosing **Kubernetes-related issues** and managing containerized workloads.
- Real-time operational knowledge of **Kubernetes services** and orchestration.
- Familiar with **Terraform** and **Python scripting** for infrastructure automation and configuration management.
- Hands-on experience with **Azure services** including **AKS**, **Service Bus**, **SQL Database**, and **Virtual Machines**.
- Proficient in **Azure Data Factory (ADF)** for pipeline monitoring and **data transformation** tasks.
- Experience implementing **medallion architecture** for scalable data Lakehouse solutions.
- Skilled in working with **SQL Database** and **MongoDB**, including writing **basic to intermediate SQL queries**.
- Experience using **Quantum Metrics**, **SolarWinds DPA**, and **SQL Server Management Studio (SSMS)** for performance monitoring.
- Hands-on experience in designing and deploying **CI/CD pipelines** for continuous integration and delivery

NTT Data**March 9th 2020 – November 6th, 2020****Project:** APM and Server Monitoring of NTT Data Servers**Roles and Responsibilities:**

- Managed monitoring of application performance and server health across NTT Data's infrastructure.
- Implemented APM tools to detect and diagnose performance issues.
- Analyzed server logs and performance metrics to preemptively address potential downtimes.
- Provided detailed reports to IT management on system performance and areas for improvement.
- Conducted root cause analysis for incidents and developed strategies to prevent recurrence.
- Ensured compliance with internal and external standards for server performance and uptime.

Tata Consultancy Services**(Contract– Avantha Technologies)****October 7th 2019 to****February 28th 2020****Project:** Motorola: Application Performance and Server Performance Monitoring with AD**Roles and Responsibilities:**

- Monitored the performance of Motorola's applications and servers, focusing on AD integration.
- Analyzed application logs and server metrics to ensure seamless operation.
- Troubleshooted and resolved AD-related performance issues.
- Collaborated with the infrastructure team to optimize server performance.
- Developed monitoring dashboards for real-time insights into application and server health.
- Conducted performance testing to ensure systems could handle expected load levels.

UTC Climate, Controls & Security**March 1st 2017 to****August 19th 2019****Project:** Eco-Energy: Monitoring of Network Devices and Controllers' Performance**Roles and Responsibilities:**

- Led a team responsible for continuous monitoring of network devices and controllers.
- Analyzed network performance data to identify trends and predict potential issues.
- Managed and optimized monitoring tools to ensure accurate and timely data collection.
- Coordinated with cross-functional teams to address network-related concerns.
- Provided regular updates to management on network performance and improvement plans.
- Developed and implemented protocols for troubleshooting and issue resolution.

Wipro Technologies Pvt Ltd

02-05-2016 to 28-02-2017

Project: Eco-Energy: Monitoring of Network Devices and Controllers' Performance

Roles and Responsibilities:

- Monitored network devices and controllers to ensure optimal performance.
- Utilized monitoring tools to track network traffic, device health, and performance metrics.
- Responded to network issues in real-time to minimize downtime.
- Generated performance reports and provided insights on potential areas for improvement.
- Collaborated with the network engineering team to optimize device configurations.
- Maintained monitoring solutions to deliver actionable data to stakeholders.

Ani Technologies Pvt L

td (OLA CABS)

17-11-2014 to 30-05-2016

Project: Ola Application Performance Monitoring Services and Report Downtime Issues

Roles and Responsibilities:

- Monitored application performance to ensure high availability and minimal downtime.
- Analyzed system logs and user reports to identify performance bottlenecks.
- Collaborated with the development team to troubleshoot and resolve application-related issues.
- Automated monitoring tasks using scripts and tools to enhance efficiency.
- Provided detailed downtime reports to stakeholders, highlighting root causes and suggesting preventive measures.
- Maintained uptime and response time benchmarks, ensuring compliance with SLA's

Technical Skills

- **Soft Skills:** Azure Devops, Docker, Kubernetes, Terraform, Git
- **Ticket Tools:** Fm Pilot, Jira, ServiceNow
- **Monitoring Tools:** Datadog, SolarWinds, Dynatrace, PRTG, Pingdom

Education

- **B. Tech in ECE Engineering** JNTU Kakinada | 2008-2012 | Aggregate: 60.50%
- **Intermediate** Board of Intermediate Education, Andhra Pradesh | 2006-2008 | Aggregate: 59.00%
- **SSC** Board of Secondary Education, Andhra Pradesh | 2005-2006 | Aggregate: 69.00%

Declaration

I solemnly declare that the above information is truly stated, and I am competent to furnish adequate details whenever requested.
