

Professional Summary

Results-driven Cloud and DevOps & Site Reliability Engineer (SRE) with over 9 years of experience in designing and implementing cloud-based solutions across financial services, healthcare, and retail sectors. Proficient in troubleshooting production and development issues, automating processes through scripting, and enforcing security controls. Known for providing technical guidance and support to teams, driving efficiency, and ensuring compliance with industry standards.

Core Skills & Tools

- **Cloud Technologies:** Over **6+ years** in **Azure Cloud** (IaaS, PaaS, SaaS).
- **Microsoft Azure:** Hands-on experience managing Azure Services, Power Platforms via **Azure Portal & PowerShell**.
- **Infrastructure as Code:** Proficient in provisioning resources with **Terraform** and **ARM templates** for automated resource management.
- **Monitoring & Support:** Skilled in using **Azure Monitor** and **CloudWatch**, **Prometheus**, **Datadog** for troubleshooting and performance monitoring.
- **Security & Compliance:** Experience with **Azure Sentinel**, **O365**, **Azure Policy**, **Azure Firewall**, **Forcepoint**, and **Key Vault**.
- **CI/CD Pipelines:** Implemented automated pipelines using **Jenkins**, **Git**, and **Azure DevOps**.
- **Scripting:** Strong Automation Scripting Knowledge on PowerShell, Python and Java Script.
- **SDLC & ITIL:** Good knowledge of **Software Development Life Cycle** and **ITIL processes**.

Key Skills:

- Cloud Platforms: Azure, Aws
- IaC: Terraform, CloudFormation Templates
- Containerization: Docker, Kubernetes, OpenShift
- CI/CD Pipelines: Jenkins, Az Devops, Gitops, Argo CD
- Scripting: Python, Bash, PowerShell
- Operating System: Windows Server, Linux
- Serverless Computing: Lambda, Azure Functions
- Version Control: Git, Bitbucket, Azure Repos

Professional Experience

Senior Software Engineer | Evoke Technologies., Hyderabad | 03/2023 – Present

- Design, implement, and manage Azure cloud infrastructure to support application deployment and operations.
- Collaborated with development teams to create and maintain CI/CD pipelines for application deployment.
- Optimized application performance and scalability on Azure platforms.
- Designed and implemented Infrastructure as Code using Terraform to provision and manage cloud resources across multiple environments (Dev, QA, Prod).
- Maintained compliance with security standards and best practices in cloud architecture.
- Leverage Azure services including Azure Kubernetes Service (AKS), Azure Functions, and Azure Databricks for application development and deployment.
- Automated infrastructure provisioning using Infrastructure as Code (IaC) tools such as ARM templates, Bicep, and Terraform.
- Collaborated with cross-functional teams to drive Agile/DevOps culture, reducing release cycle times and improving deployment success rates.
- Built Python-based automation scripts to optimize log aggregation, monitoring setups, and custom reporting tools.
- Monitor application performance and troubleshoot issues, implementing solutions to enhance reliability and efficiency.
- Monitor the Azure infrastructure using Datadog and create automated remediation.

Cloud Engineer II | Honeywell Tech., Madurai | 09/2022 – 01/2023

- Automated infrastructure provisioning and configuration management using Terraform, Ansible.
- Experienced in provisioning VMs, virtual hard disks, and virtual networks using Terraform and ARM templates.
- Reduced cloud infrastructure costs by 30% through strategic cloud cost optimization using native tools and custom automation.
- Implemented Azure Pipelines with YAML for build automation, artifact management, and deployment to

Azure Kubernetes Service (AKS), App Services, and Virtual Machines.

- Led containerization initiatives using Docker and orchestrated microservices with Kubernetes and enhanced scalability.
- Implemented robust monitoring and logging systems using Prometheus, Grafana, ELK Stack, and Datadog, improving operational efficiency.
- Developed Python scripts to manage resource scaling, backup tasks, and custom metrics collection for cloud infrastructure.
- Deployed and managed Azure Managed Databricks clusters integrated with Azure Kubernetes Service (AKS) for dynamic resource allocation and optimized cost-efficiency.
- Used Databricks Operator for Kubernetes to automate job submission, cluster creation, and lifecycle management via Helm and YAML definitions.
- Integrated Databricks notebooks with Azure DevOps CI/CD pipelines, implementing automated testing, linting, and deployment workflows

Azure Engineer | Infomerica India., Hyderabad | 06/2021 – 07/2022

- Azure Network Design: Designed and configured Azure Virtual Networks (VNETs), subnets, network settings, DNS Configurations, security policies, and routing protocols to ensure efficient cloud infrastructure.
- Technical Documentation: Contributed to technical design documentation and gathered business requirements to drive automation initiatives.
- Managed Azure infrastructure services including Virtual Machines, Storage Accounts, Networking (VNet, NSG, Load Balancers), and Azure Active Directory.
- Monitoring and Compliance: Maintained Service Level Agreements (SLAs) and Service Level Objectives (SLOs), utilizing Azure Monitor, Log Analytics Workspace, and Azure Dashboards for application monitoring.
- Automation Development: Develop automation scripts using Python, Java, JavaScript to streamline process.
- Infrastructure Scalability: Built and operated scalable software and infrastructure solutions, including VM Scale Sets and App Services.
- Implemented industry best practices and provided Proofs of Concept (POCs) for Azure Cloud Environment.

Software Engineer | Zebra Technologies., | 08/2016 – 06/ 2021

- Delivered technical support for Windows-based systems and peripherals in a corporate setting.
- Assisted with system imaging, software installations, and patch updates.
- Monitored and responded to helpdesk requests and ensured timely closure of incidents.
- Azure IaaS Management: Deployed and maintained all Azure IaaS services, ensuring optimal functionality and performance.
- Administered Microsoft 365 tenant including Exchange, Teams, SharePoint, and OneDrive for over 2000 users.
- Configured and managed Microsoft Entra ID (Azure AD) including conditional access, enterprise apps, and B2B guest access
- Maintained accurate documentation of incidents and solutions in the ticketing system.
- Maintained hybrid identity setup using Azure AD Connect; monitored sync health and resolved directory sync issues.
- Created and maintained RBAC roles, enforcing least privilege access and segmenting admin responsibilities.
- Enforced and monitored MFA policies, self-service password reset, and risky sign-in mitigation.

Education

Bachelors Computer Science, Acharya Nagarjuna University, Completed in 2014.

Certifications

Azure Fundamentals AZ -900

Azure Administrator -AZ-104

Azure DevOps Engineer - AZ-400

Certified Kubernetes Administrator - CKA
