

SWATHI VUNNAM

Contact No: +91-8985506532

Email Id: swathivunnam95@gmail.com

Objective

To work in a creative and challenging environment where I could constantly learn and successfully deliver solutions to problems and contribute effectively for the growth of the Organization.

Professional Summary

- Having Total 7.1 years of Experience in IT industry.
- 6.9 years of Relevant Experience in Devops comprising Build, Deploy and Release Management with good trouble shooting skills and Problem Analysis for Application support in production and non- production environment.
- Hands-on knowledge of software containerization platforms like Docker and Kubernetes container orchestration tools.
- Building/maintaining Docker container clusters managed by Kubernetes.
- Managing Kubernetes Deployment activities in both Production and Test Environments.
- Worked on SSL Cert Installations and Patching activities on Linux Servers.
- Scaling k8 pods as per the project/Customer requirements.
- Worked on Provisioning activities on our Customer UI's and Azure.
- Created few k8 clusters on Azure Cloud.
- Monitoring deployed resources on Cloud by creating alerting matrix.
- Monitoring pod health checks.
- Worked with Dev teams and Customers for pod config changes as per the Customer requirements.
- Handled multiple MI calls with good collaboration with Service operations teams and Dev teams.

- Extensively worked on Jenkins by installing, configuring and maintaining for the purpose of continuous integration and continuous delivery (CI/CD).
- Worked extensively on setting up new build jobs, plug-ins installation by using Jenkins.
- Good understanding of installing Nagios server. Managed and configured nodes with the continuous monitoring tool Nagios.
- Experience in deploying the code through web/application servers like Apache Tomcat.
- Good knowledge on Git.
- Good understanding of Azure services.
- Working closely with Infra, Development, Test and Database Teams.
- Regularly performed health checks on applications to ensure service availability.
- Worked on automation scripts to make daily tasks simple.
- Involved proactively p1 issues and driven outage calls with zero escalations.
- Quick learner with positive attitude learning to new technologies.
- Coordinate meetings with customers and understand the requirements/issues .
- Application configuration, Software installations, Troubleshooting & debugging application issues and ensure teams adhere to the standards.

Organization Summary :

Organization	Designation	Timeline
Tech Mahindra	Associate Software Engineer	July 2018 – Dec 2021
Oracle India	Program Analyst	Dec 2021 – Sept 2025

Education Details

- **Bachelors** in Computer Science from V R Siddhartha Engineering College(2017).
- **Intermediate** MPC from Narayana Jr. College(2013).
- **SSC** from Railway High School(2011).

Technical Skills

- Container Technology : Kubernetes, Docker
- Server and Service Monitoring : Grafana, Kibana
- Scripting : Python
- Continuous Build Integration : Jenkins
- Version Control : GIT
- Database : SQL

Achievements

Microsoft Certified: Azure Fundamentals, Azure Administration Associate

Work Experience

ORACLE

		OCSC – SaaS Marketing
Project Name	:	Cloud
Environment	:	Linux, Docker & Kubernetes
Team Size	:	20
Duration	:	Dec 2021 to till date

Description:

This SaaS Marketing Cloud project linked to oracle cloud infrastructure where we manage multiple clients using Oracle Major Products like Responsys and Eloqua.

Responsibilities:

- **Managing Kubernetes deployment activities** in Production Environments during the Maintenance Window.
- **Monitoring the launches** that are being sent to the customers by clients using Responsys/Eloqua.

- Maintained reliability across **20+ production environments** in JAPAC, EMEA, and AMER for **Oracle Marketing Cloud** by resolving alerts and conducting detailed post-incident RCAs, **reducing repeat incidents** by 35% and improving system response times by 20%.
- **Worked with Development team** during release activities.
- **Creating/Approving the Change request** for the Production deployments.
- Worked on **OS patching** for Linux servers
- **Managing multiple docker containers** for multiple services.
- Maintaining source code repository for **all major and minor releases**.
- Working on changes in **Pod config files along with Dev team** while trouble shootings
- **Handling outage calls/MI calls** along with the customers.
- Monitoring **the health of pods on K8 cluster**.
- Sanity checks on **docker containers and do start/stop/restart** of containers
- Working on Multiple critical alerts and fix them **without failing the SLA**
- **Reduced alert volume by 40%** by identifying and eliminating root causes of ~30% of recurring issues through RCAs and automation, including the creation of Bash and Python scripts to handle routine tasks like bastion access and Tomcat dump collection.
- Enhanced observability and incident detection by integrating **Prometheus, Grafana, and Kibana**, enabling **25% faster bottleneck identification and automatic alerting for selfhealing systems**, contributing to increased system resilience
- Identify, troubleshoot and resolve issues related to **build and deploy process**.
- Experience with container-based deployments using Docker, working with Docker images, Docker Hub and Docker-registries and Kubernetes.
- Kept track of all releases and request of the developers through infrastructure management tool.
- **Developed, maintained and distributed** release notes for each scheduled release.

TECH MAHINDRA

Project Name : Ecomp (AT&T)

Environment : Linux, Tomcat, Jenkins, docker, kubernetes and Maria DB

Team Size 12

Duration : Dec 2018 – Dec 2021.

Description:

This Ecomp project linked to multiple environments core to cloud service with open stack environments managed to k8s servers.

Responsibilities:

- Worked on **access provisioning activities** for multiple users into Cloud Environments
- Installed required Jenkins plug-ins and **Creating and maintaining Jenkins Jobs.**
- **Configuring the Docker containers** and creating Docker Compose for different environments.
- Implementing containerization for application launching containers and images.
- Responsible for building and maintaining Docker container clusters managed by Kubernetes.
- Responsible for installation, Managing and configured nodes with the continuous monitoring tool Nagios.
- Involved Patching and **SSL certs installation Activities.**
- **Involved production and non-production maintenance Actives.**
- **Performing deployments** to multiple environments like Dev, QA & Production environment.
- **Provided 24x7 production support** and development environments. Ability to communicate requirements effectively to team members and manage applications.
- Handled multiple **customer related tickets** and order related tickets without SLA failure.
- Participated in **the release cycle of the product** which involves environments like Development, Test and Production.
- Worked on creating multiple **Virtual Machine instances in Azure Cloud**

Declaration:

I hereby declare that the particulars given above are true and correct to the best of my knowledge and belief.
